- OBOPUS
- Comments on Monthly Activities Report

Reference: SOAA-7112, KAPOK-2119

1. In response to your request in reference paragraph 4.a.(3) for comments on the future of the ALLION operation we believe that there should be no further attempts to contact the subject by air in light of the opposition capabilities demonstrated in the APPLE affair. However, we would like to encourage the formulation of an overland contact plan and would be interested in the details of any plan which you devise.
2. In paragraph 4.e.(1) you mention the commission of several security violations by RNDESIGN and his consequent isolation on Paros. We would appreciate receiving a full report on RNDESIGN and an estimate as to the extent that OBOPUS operations have been compromised due to his actions.
3. Paragraph 4.f.(3) states that you are basing your spotting activities on the plan for 1954 operations handed [] by [] Inasmuch as this plan was shown in draft to [] and no copy was retained we would appreciate receiving a copy of it even if its proposals are considered to be tentative. The guidance for '54 operations currently in preparation in headquarters will not (and cannot in the nature of things) be a precise operational plan but rather a general statement of objectives. We would therefore appreciate being kept as current as possible on the state of field planning in terms of the teams and individuals to be used and the tasks that will be set them.
